The memories that have come of the mother who was born here are very affecting. Her quiet character, her sense of duty and her disilke of ostentation have come back to me with increasing force as these years of duty have accumulated. Yet perhaps it is appropriate that in a place of worship I should acknowledge my indebtedness to her and her remarkable father, because, after all, what the world now is seeking to do is to return to the paths of duty, to turn from the savagery of interests to the dignity of the performance of right. "I believe as this war has drawn nations temporarily together in a combination of physical force, we shall now be drawn together in a combination force that is irresistible. "In the case of the vast countries of Asia, without good government, in the period before independence can be exercised there must be assistance from the outside, and this is bound to lead to international difficulties unless some power is intrusted by the nations of the world with the duty of providing this assistance.
"International waterways will be more important under any future settlement in Europe than in the past. More than one case can be cited beside the Darddanelles and the Danube, where possession by one power of means of access to the ocean of another power has been a contributory cause to European unrest. The Danube has been regulated by an international commission. With a league of nations there is no reason why all other similar problems should not be similarly disposed of.
